PFM Philanthropic Foundations Mechanism

PFM Statement - ITEM VIII Floor Intervention. Matheus.

- Thank you, Chair, for the floor. It's a privilege to address this Plenary speaking on behalf of the Philanthropic Foundations Mechanism - PFM
- In our first intervention at the Plenary this year, we mentioned that this is a critical moment of the Committee. We are embarking on the development of the next 4 years of work of CFS while the crises to and in food systems are only growing
- We, philanthropic organizations participating in this discussions within the PFM, understand the CFS as a reference to our own work, to how we design our own programs, how we define our priorities, how we mobilize our resources.
- This is why this year, we have chosen to really focus on the demonstrating and mobilizing the uptake of CFS policy products by philanthropic organizations, both from our membership, and beyond.
- But all of that would not be as impactful if this Committee wouldn't prove that Members and Participants are capable of reaching comprehensive and consensual-based conclusions, even within the current difficult geopolitical context we're living in. This is a very strong signal that you're showing to philanthropic organizations.
- We are showing the spirit of collaboration, preserving inclusive and participatory processes, supporting the progressive realisation of the Right to Food.
- We should continue to pursue in this direction, showing leadership, and demonstrating the value of this Committee.
- We congratulate everyone who has been tremendously important in this, the Chair and the Vice-Chair, the Secretariat, the HLPE, the Mechanisms, and the Members.
- Thank you very much.
